families in need.

From food and essential necessities to Ramadan, Eid, youth development and pathways towards independence.

Our Goals for July - December

Building a Path Towards Independence

Program Usahawan SPK (PUSPK)

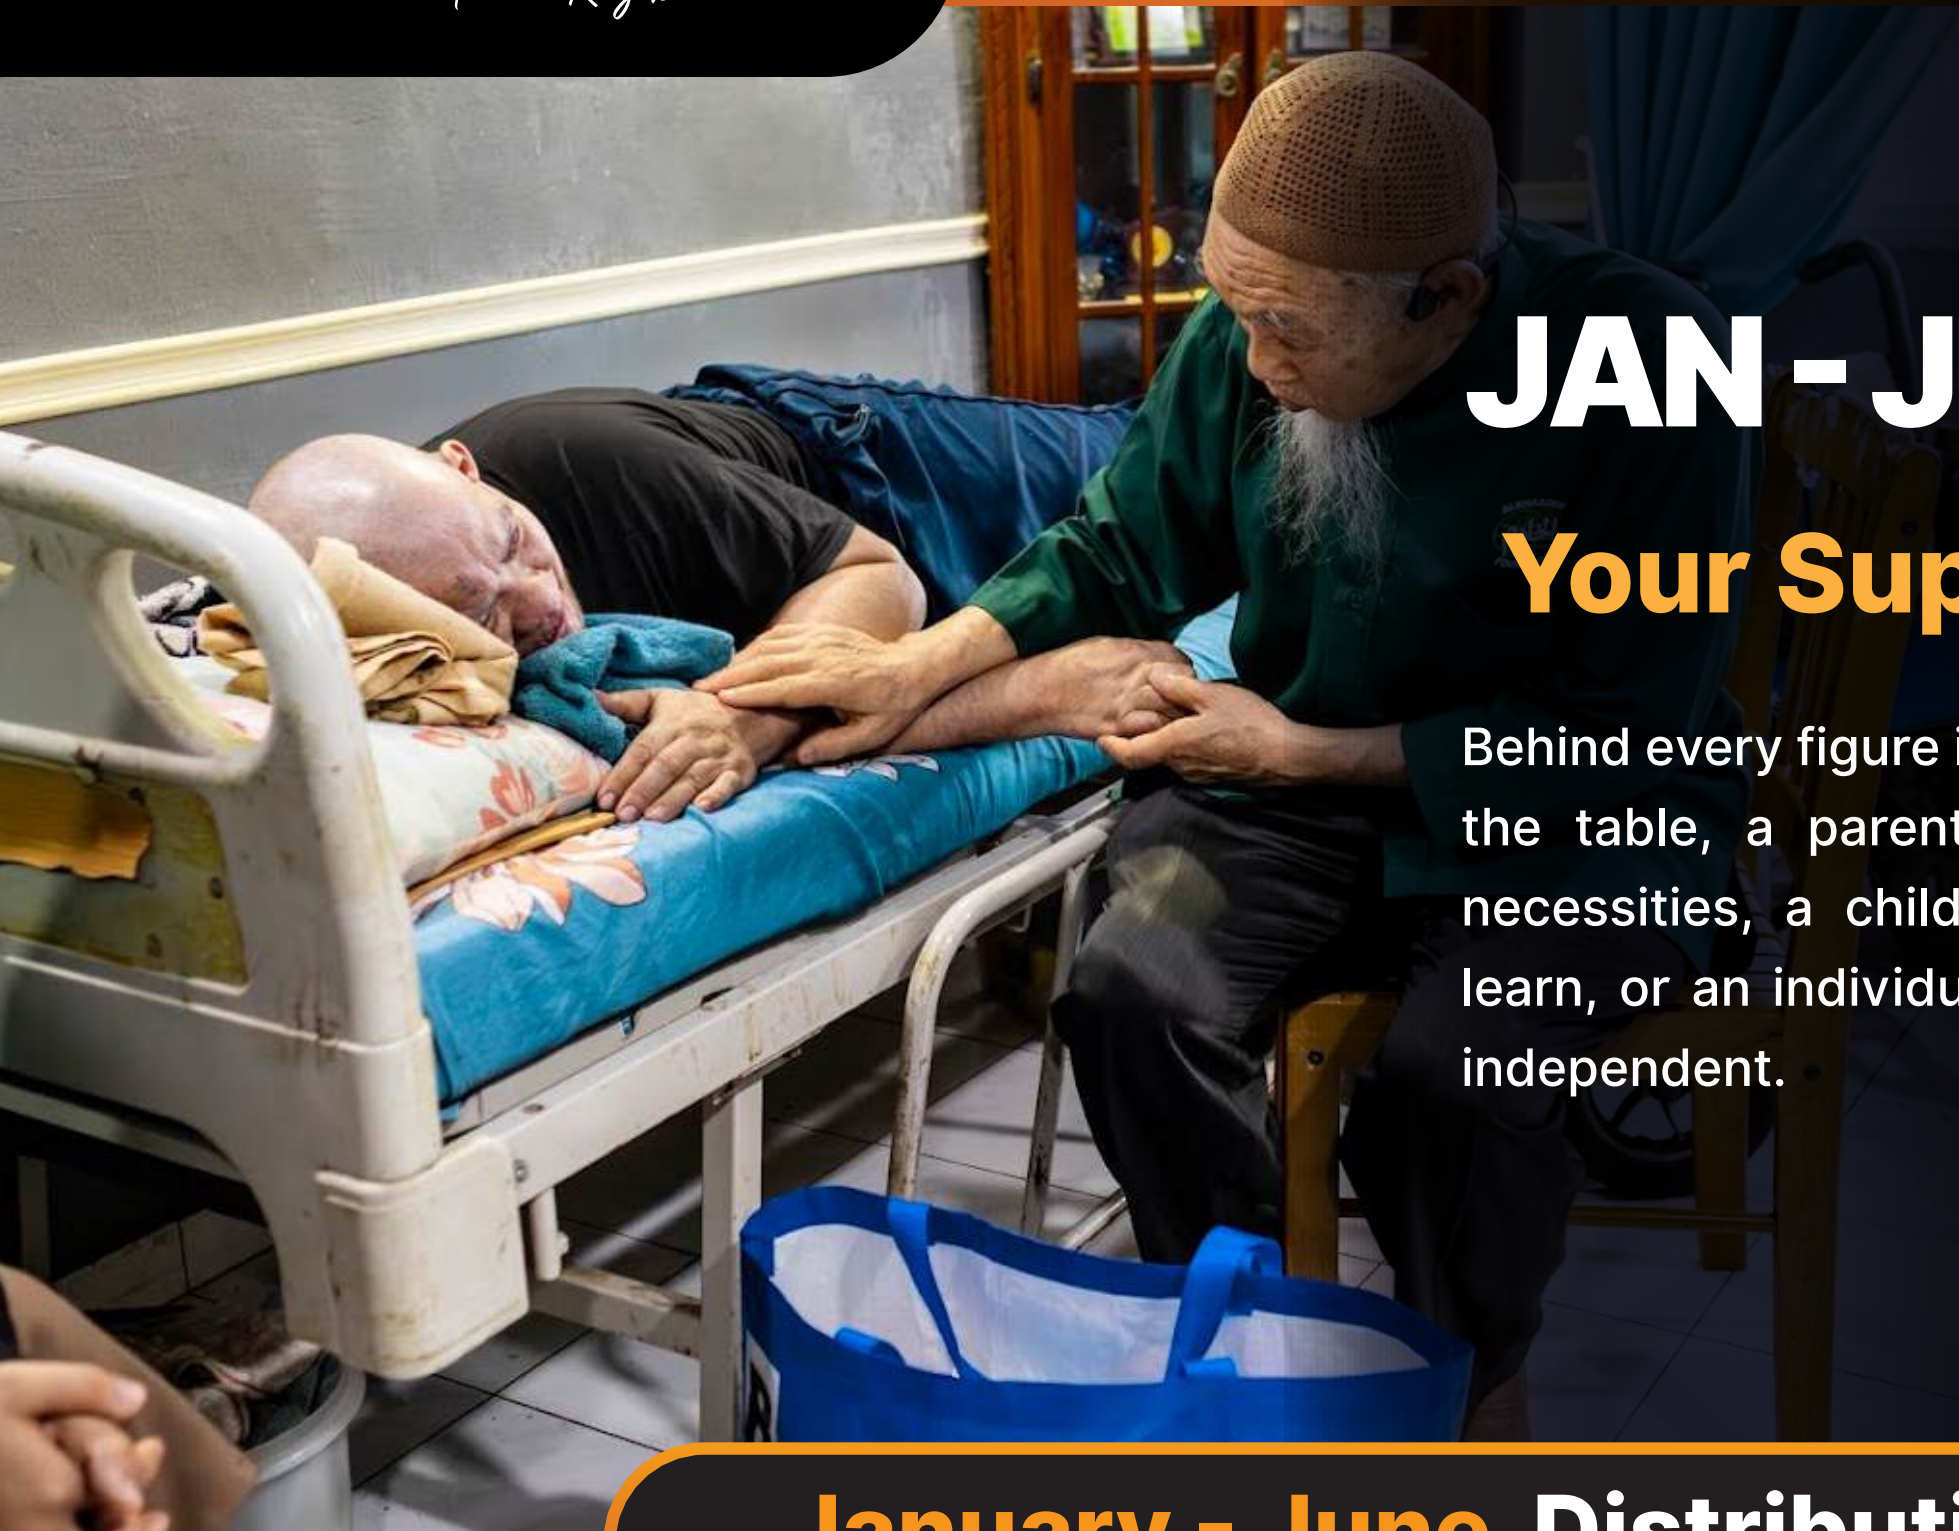

Relief → Stability → Development → Independence

At SPK, our focus for July through December goes far beyond basic relief. While we continue providing essential support like food and financial assistance, our bigger goal for the next half of 2026 is helping families build a real path toward **independence**.

Through Program Usahawan SPK, PUSPK, we are actively connecting motivated individuals with the practical skills and business opportunities they need to earn their own income. Registration for selected recipients is already open, and several participants are already taking their first real steps toward financial self-reliance.

From providing relief today to helping families build a stronger tomorrow, every contribution plays a part.

Jazakumullahu khairan, thanks to you and our generous community, Skuad Prihatin Kemiskinan served over thousands of families and individuals. May Allah reward you abundantly, Ameen.
